Fundamental niche−based community measures
spp_RR_calc_threshold 0.001

RelativeOEV

Proportion of variation in community stability explained by two types of response trait

Strength of interspecific interactions

Type of measure
- mean NA
- RD diss
- RD div
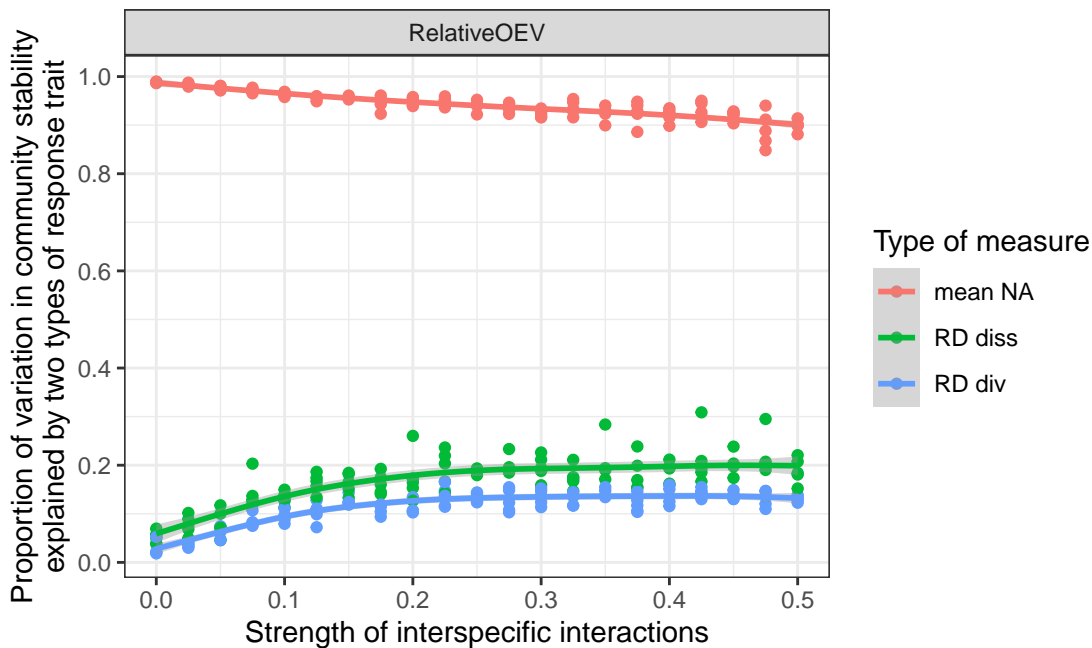

Realised niche−based community measures
spp_RR_calc_threshold 0.001

RelativeOEV

Proportion of variation in community stability explained by two types of response trait

Strength of interspecific interactions

Type of measure
- mean NA
- RD diss
- RD div
